ABSTRACT

The aim of this survey, based on material held in the Aslib Library, was to produce a list of items dealing with cost and costings in library services, for use within the Aslib Research Department. Attention has been concentrated on material published since 1960, although a few items prior to this date have been included. Items which are considered to be particularly helpful have been marked with an asterisk. During the course of the search, references were found to material on related measurements, e.g., times, and it appeared useful that these also be included. However, no exhaustive search was made for such items; hence these sections are appended not as comprehensive lists, but rather as suggested readings. (Author)

A Selective Bibliography on Measurement in Library and Information Services

compiled by Rose Reynolds

Introduction

The aim of this survey, based on material held in the Aslib Library, was to produce a list of items dealing with cost and costings in library services, for use within the Aslib Research Department. Attention has been concentrated on material published since 1960, although a few items prior to this date have been included. Items which are considered to be particularly helpful have been marked with an asterisk.

During the course of the search, references were found to material on related measurements, e.g. times, and it appeared useful that these also be included. However, no exhaustive search was made for such items; hence these sections are appended not as comprehensive lists, but rather as suggested readings.

Comparative costs of document indexing and book cataloguing. *Spec. Libr.*, 1965, v.56, p.724–726.

Costs – charging systems

40. American Library Association. Library Technology Project and Council on Library Resources
Study of circulation control systems: public libraries, college and university libraries, special libraries. Chicago, 1961, vii; 138p. (Lists times and costs for various kinds of charging systems. Discusses staff and equipment).
41. Kimber, Richard T.
The cost of an on-line circulation system. *Program*, October 1968, v.2, no.3. p.81–94. ('The unit costs are derived of the presently operating manual circulation system at Queen's University [Belfast], and the on-line computer-aided system in process of development. For the period 1971–5, during which the computer system is expected to be fully operational, they are: manual system 8.2 pence per loan; computer system 9.4 pence per loan. The computer system is thus 15% more expensive, but it will effect a 45% reduction in the library staff time devoted to circulation work').

Costs – checking
